Age Spots, Spider Veins, Wrinkles...
All a Part of Growing Older?

Not Anymore

You Didn't Get Where You Are Today by Just Accepting Life's Little Wrinkles

Skin imperfections like sun damage, fine lines and wrinkles can impact your career and social life.

Until now, skin rejuvenation has always meant a considerable investment in time and money. And lengthy treatments with long recovery times are simply not an option for people with active lifestyles and busy schedules.

LHE™, Skin Rejuvenation by Radiancy, is the safe, effective and painless method to achieve younger, healthier looking skin. A completely non-invasive, non-abrasive treatment with no recovery time; simply walk in and walk out.

For People Who Want to
Look Their Best Without Sacrifice
LHE is the **Perfect Solution**

Coming of Age

Developments in science and technology have enabled us to take a whole new look at the process of skin aging, its causes and treatments. New research has led to the development of a unique skin rejuvenation treatment using LHE technology. An innovative combination of Light and Heat Energy - LHE treats sun damage, vascular lesions, fine lines and other manifestations of aging skin. An LHE treatment is safe, painless and has no harmful side effects.

LHE
Reverses the Signs of Aging
Safely and Painlessly

LHE Technology How it Works

To reverse sun damage and remove lesions like age spots and spider veins, LHE emits a very low and ultra-safe wave of light. The Light generates Heat that is drawn to the darker pigmentation in the targeted lesions. The Heat then raises the temperature inside the lesion, thereby damaging it. The body's natural healing process works to remove the lesion, which then simply scabs and drops off or is absorbed in the skin.

To treat fine lines and wrinkles LHE employs a similar Light and Heat procedure. By initiating a natural wound healing process, LHE causes the rebuilding of new collagen under the outer layer of the skin, tightening the skin and smoothing out fine lines and wrinkles.
